

Compita Brings Public Training to London!

Athletes and sports fans from all over the UK are gearing up for this year's summer Olympics in Athens and with London bidding for the 2012 games, it will be a long time before they can support the UK's best and brightest at home.

Process Improvement Managers have no fear though, as the best and brightest are taking London by storm. You'll no longer have to take your ISO15504, CMM® or CMMI® training in Edinburgh as Compita now offers these courses in London and Tokyo (taught in English with Japanese translators). In response to overwhelming requests from our customers, classes will be held in a venue within easy reach of Heathrow Airport.

These workshops are highly interactive and are led by experienced Lead Assessors. Book now to reserve your seat, as spaces are limited. For further course descriptions and the full public schedule, as well as a price list contact Compita or visit our website at www.compita.com and click on training.

The Benefits of CMMI®

Organisations large and small can sometimes find themselves in very difficult situations. Is your organisation always fighting fires by committing to too many projects? Do you suffer from a blame culture or unpredictable quality? If so, heading down the path of a proven industry standard such as the CMMI® will help to establish best practices for software development within your organisation.

The CMMI® model provides a more flexible and powerful approach to process improvement by drawing on the strengths of SW-CMM® and ISO15504. This will allow your organisation to use both a staged and continuous improvement model that is adaptable to your company's needs. Here's a taste of just some of the [benefits](#) you can gain by implementing CMMI® in your organization:

- Increased productivity
- More defects detected pre-test
- Improved time to market
- Reduced defects delivered to customer
- Greater customer satisfaction
- Higher staff morale
- More repeat business

Learn about CMMI® today and help your company to achieve the standards they are capable of.

To find out more about how CMMI® or other process improvement models can benefit your organisation contact Compita and talk to one of our experienced process improvement specialists today.

®Capability Maturity Model, CMM and CMMI are registered in the U.S. Patent and Trademark Office by Carnegie Mellon University.

NEW London Sept 24th 24th Sept Edinburgh

Organisation Metrics

29th-30th Sept Edinburgh

The "How" of CMMI®

While the CMMI® classes will teach you the industry's best practices in "What to do" in order to put your business on the right track, you may need help in "How to do it". Don't let panic set in - Compita can help. By adding on an extra day to your CMMI® training Compita can teach you how to put best practice into place while still allowing you to maximise your time and training budget.

Compita's Process Professional Improvement Management (PPIM) method answers the "How" question perfectly for those involved in running process improvement programmes. Adding our "Establishing A Process Improvement Programme" workshop is the perfect introduction to the PPIM method and covers everything from kick-off and process definition to rollout, buy-in, and measurement of progress. The PPIM one-day course provides an instant toolkit for SPI success.

Join us in September to learn how to put your CMMI® knowledge to practice.
